

The main power plant shown redesigned as a wide-open student area, including a wrap-around track and activities center.

NADC REPURPOSING PROJECT - The Blackhawk Power Station Demolition & Conversion project for the Beloit College in Beloit, WI made use of the old power house to be converted into a recreation center.

SUSTAINABILITY & NADC

Repurpose Dismantling

In demolition, the project aims to tear down a structure, building, or property.

Repurposing can be a cost-effective strategy since the repurposed area or structure allows a business to avoid major new construction costs.
